Subject: Lotronex and Accutane issues

Bronwyn and Mary Jane,

The Lotronex issue is COMIS 4170. I actually heard from Seth Ray yesterday about the project and it appears that he doesn't believe much work is left since the company withdrew the product from the market.

Since the new project is regarding Accutane, I need a new GC Tracking Form. It may have the same issues as Lotronex, but we need to give GC credit for looking at the issues again for Accutane. Please submit a new form and a description of what needs to be done. Don't worry about requesting a high priority to Jane. I will be meeting with her and GC tomorrow morning. If you can fax me over a new form today, I will bring the new Accutane issue up at the meeting and request that it be placed on the Top Priority list.

My fax number is 827-5562.

Thanks for keeping me posted.
Tawni
